Art Unit: 2815

This application contains claims directed to the following patentably distinct species of the claimed invention: I. A method of quantum computing which includes at least one constriction junction. II. A method of quantum computing that includes at least one tunnel junction. III. A method of quantum computing that includes at least one two-dimensional gas structure. IV. A method of computing as recited in claim 8. V. A method of computing as recited in claim 9. VI. A method as claim 9 with insulating crystals (claim 10). VII. A method as claim 9 with Al, Nb, Pb, or Sn (claim 11). A method as 9 with YBaCuO (claim 12). VIII. Claim 21. IX. Claim 23. X. Claim 24. XI. Claim 25. XII. Claim 29. XIII. Claim 30. XIV. Claim 31. XV. Claim 32. XVI. Claim 33. XVII. Claim 34. XVIII. Claim 44. XIX. Claim 45. These species claims above have claim 1 as generic. The next species claims have claim 50 as generic. XX. Claim 51. XXI. Claim 52. XXII. Claim 53. XXIII. 54. XXIV. 55. XXV. 56. XXVI. 58. The next species have claim 62 as generic. XXVII. 63. XXVIII. 64. XXIX. 65. XXX. 66. XXXI. 67. XXXII. 68. XXXIII. 70. XXXIV. 74. XXXV. 75. The next claims are generic to claim 76. XXXVI. 77. XXXVII. 78. XXXVIII. 79. XXXIX. 80. XL. 81. XLI. 82. XLII. 84. XLIII. 86. XLIV. 87. Claims 88-90 are separate species and genus. Claims 91-92 are also separate species and genus.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 50, 62, 76, 88, 91 are generic to certain claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
